

El Torcal Bloc, Andalucia

Really well known as sport climbing area, the karst blocks of El Torcal seem to offer endless bouldering possibilities.

The approach notes are on the photo below:

Radio Mast Block

1/ Right Edge Radio Mast Bloc 6a

The right edge of the boulder near the little building and the radio masts - start sitting from the sloping ledge. Slap up the arête to a smooth finish over the prow.

Traditional - it was chalked.

Tribute Act Buttress

2/ Tribute Act 6c

Sit start under the shelf. Gain the next level to make a powerful layback and mantel move to stand up.

John Hunt 17/Aug/2011

3/ Centre 4+

Straight up the middle of the block from standing - all slopers and pinches.

4/ Right Sitter 6b

Sit start under the shelf. Use the pocket to make a long reach for a shallow pocket over the bulging wall.
